

TECHNOLOGY AND ADVANCED THERAPIES

Sensory Integration Program

Sensory integration utilizes a multi faceted sensory approach to restore a normal sense of smell, taste, sound, touch and site in a child.

Ontogenetic Mobility Program

Different levels of the brain control neurological functions. This program utilizes these principles to restore and reorganize the medulla oblongata, pons, midbrain, cerebellum and cortex in recognition of how well individuals develop.

Nutrition Program

This program is a complex multi faceted approach to restore metabolic and gut function to the child. The gut track is considered the 'second brain'

Detoxification Program

This program utilizes the latest in innovative approaches to safely detoxify children from serious Candida toxins and heavy metal toxins. These toxins adversely affect brain function

Advanced Chiropractic

This program utilizes the accepted principles of chiropractic to restore normal neurological and structure function to the child

Cranial Sacral Therapy

This program utilizes the accepted principles of cranial motion and health. The brain needs to 'breathe'. Cranial therapy helps to restore the natural motion of the brain and cranial sacral rhythm of the child

Emotional / Limbic Therapy

This program seeks to restore the limbic brain. This part of the brain controls all emotions, memory, basic human interactions and pre cortical behavior patterns

Social Program

This program helps parents and children work together in harmony and mutual respect. It is also designed to help children develop a sense of responsibility and integrity

Respiratory Program

Oxygen is the primary food of the brain. These sophisticated programs provide dramatic increases of oxygen to the brain as well as re-teaching the brain 'how to breathe'.

Hyperbaric Oxygen Therapy

Utilizes Henry's law of Physics which states that any gas under pressure will dissolve into liquid. Hyperbaric Therapy, first utilized at the turn of century, greatly enhanced oxygen to the brain and stimulation improved brain function

Homeopathy

Consists of the use of microdosages of substances that could produce similar conditions to the ones to be treated, choosing the one that suits the majority of the patient's symptoms, according to 200 years of international clinical practice and research initiated by Samuel Hahnemann.

Myofascial therapy

This therapeutic method realigns and restores the vital connective tissue that surrounds all the muscles, organs and structures of the body. Restoring facial tension patterns in critical to improve a child's structure and brain function.
