

Medequip Continues Deep Relationship with Inova Health for the TWIG Project

April - 2011

Blue Bell, PA – The Inova Health System and Medequip International continued to deepen their decades-long relationship with a new construction project at Inova Alexandria Hospital.

For this exciting Telemetry project, Medequip International will provide its outstanding medical equipment planning services to the Hospital. These services include equipment specifications and associated deliverables, as well as procurement services for the entire project.

“We are thrilled to continue our deep and successful relationship with the Inova Health System on their strategic construction projects,” said Trish Griffin, Medequip International Vice President of Equipment Planning and dedicated account manager for Inova Health.

Ms. Griffin continued, “It’s hard to believe that this will be our twentieth (20) project for the (Inova) Health System. We have developed such a chemistry over the years; that we know exactly how each other works and how we work together to create successful hospital construction projects.”

Medequip International has worked with the Health System for over 15 years on a variety of projects in all of the Systems’ eight (8) major facilities. From Central Labs, to Pediatric Units, to Pharmacies, to Nuclear Medicine Units, to Emergency Departments, Medequip International and Inova Health have completed many successful projects.

For the new Project, Medequip International will hit the ground running in April.

Ms. Griffin concluded by saying, “Inova is a long-term client but every single project is the most important in the world to us. We never rest on our past successes and always strive, in partnership with Inova, to be better and better at delivering the vision of their latest initiative..”

Medequip International is the pioneer in medical equipment planning and management services. Founded in 1977, and with a global client base, Medequip International has successfully completed over 1,500 projects, around the world. Service offerings include all phases of equipment planning and management but also procurement, installation, transition management, and design and architectural support services.
