FEBRUARY 2008

The Merion is South Jersey's premiere catering and special events facility. Fresh from a multi million dollar renovation, the Merion is an exquisite European designed masterpiece. Equipped with four ballrooms, all with different influences, the Merion is able to satisfy the tastes of every client. Known for its wonderful food, the Merion holds an excellent reputation by preparing delicious cuisine for every event. Accompanied by professional white gloved service every detail is tastefully considered to make your special occasion a memorable one.

During renovation, managing partner Vince Mazzella recognized that the facility would require complete re-wiring, and he decided to replace the outdated phone and paging /sound systems with state-of-the-art equipment. The Merion contracted with Greg Gutos of USA Phone.com in Cherry Hill, NJ to install their new communications systems. USA Phone also replaced all the wiring, including the voice, data and paging. The process went well, thanks to excellent support provided by the service team at USA Phone.com .
