March 2008

CONSTRUCTION COMPLETE

March 2008 Cherry Hill NJ - USA Phone.Com recently finished a complete makeover and refurbishing of their corporate offices located at 1790 Rt. 70 in Cherry Hill. The exterior remodeling included raising the exterior walls, new stucco, a new entrance, awnings, signs and a visit by Mayor Bernie Platt of Cherry Hill.

"Cherry Hill is the regions hub for commerce and I am happy to see successful businesses, like USA Phone.Com, reinvesting capital back into our business community"

Cherry Hill Mayor, Bernie Platt.

RENOVATION WORK

GENERAL CONTRACTOR

We decided to stay in Cherry Hill and wanted the building to make a statement since it is in a highly visible location" said USA Phone.com CEO, GM Gregory Gutos. We hired general contractor Tom Wittman of Wittman Construction to hire/manage the subcontractors and we could not be more happy with the results. Tom went beyond our expectations in every detail and aspect. His goal was to make us happy. I would highly recommend to include a call to Tom Wittman at 609-261-0606 for any bid or project you might have, including new building, repair, renovations, additions, tenant fit-out and building maintenance.

SIGNS /WINDOW PANELS

We removed the old awnings, raised walls and re-stuccoed the building to improve the look. We hired GM Steve Trifiletti of ABC Sign Systems Inc. 856-665-0950. Steve delivered a professional solution, including custom made Channel letters and stretch fabric window panels. Steve provided great work and expert service all within budget.
